### **EXAMINER'S AMENDMENT**

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or disclose a drive circuit comprising, in combination with the remaining features of the claims, a first transistor having a control and a first main electrode connected to an output terminal side and a second main electrode connected to a voltage source side; an operational amplifier having an output connected to the control electrode of first transistor; a second transistor having a control electrode connected to the control electrode of first transistor; wherein the output terminal is connected to one input of the operational amplifier, and a voltage according to a current which flows through the second transistor from a resistor is inputted to another input of the operational amplifier (claim 7); a drive circuit comprising, in combination with the remaining features of the claims, a first transistor for flowing a current via an output terminal; a second transistor with which the first transistor forms a mirror circuit; and an operational amplifier for controlling an output voltage which is supplied to the output terminal by first transistor, wherein the output terminal is connected to one input of the operational amplifier, and the voltage converted by a resistor is inputted to another input of the operational amplifier (claim 8); claim 9 further recites a second amplifier wherein a voltage according to a current flows through the first transistor is inputted to the second amplifier. Reasons for the allowance of claims 1 and 5 were given along with the Notice of Allowance dated 11/05/2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
